

A Souvenir Selection of the Anti-Saloon Addresses Delivered at the Annual Congress of the Ohio Anti- Saloon League at Columbus, Dec. 11-13, 1894

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

(Mitchell Kuhn III)

A SOUVENIR SELECTION OF THE ANTI-SALOON ADDRESSES DELIVERED AT THE ANNUAL CONGRESS OF THE OHIO ANTI-SALOON LEAGUE AT COLUMBUS, DEC. 11-13, 1894

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Original publisher: Reston, Va. : U. S. Geological Survey ; Denver, CO : Available from U. S. Geological Survey Information Services distributor, 2003. LC Number: TN460 . G46 2003 OCLC Number: ocm53949903 Subject: Mercury. Excerpt: . . . Mercury in Coal and Mercury Emissions from Coal Combustion By Robert B. Finkelman Abstract Mercury emissions from coal-fired electric generating utilities are a major uncontrolled source of mercury in the environment. This mercury may be contributing to serious health problems in segments of our society. The USGS is compiling information on mercury in coal that may be useful in developing strategies for reducing mercury emissions from coal use. The USGS coal-quality database contains information on mercury concentrations in more than 7,000 coal samples. Detailed geochemical analysis has helped to determine that mercury in coal is commonly associated with pyrite, but other modes of occurrence may be locally important. Physical coal cleaning removes, on average, 37 percent of the mercury. Characterization-Figure 8. Four Corners coal-fired electrification power plant near Farmington, N. Mex. Emissions from such power plants that use coal of feed coal and its combustion byproducts is helping to further for fuel are under study as sites of potential mercury contamination to better understand the behavior of mercury in utility boilers. local and regional environments. mercury in coal is about 0.2 g/g (micrograms/gram); values exceeding 1 g/g are rare. On an equal energy basis, the highest mercury concentrations are found in the Gulf Coast lignites (36-120 lb of Hg/10 Btu), and the Hams Fork region coal (12 lb of Hg/10 Btu) since the passage of the 1990...
