LIBRARY AND INFORMATION TECHNOLOGY: CONCEPTS TO APPLICATIONS

2000. Hardcover. Book Condition: New. 292 Library information technology is one of the major tool of today to shape our society and our institutions particularly our libraries. Our education and cultural infrastructure must change to meet the challenges, addressing them through new and creative educational techniques. It has been evident for over half a century that libraries can no longer comprehensively collect in a wide variety of subject areas. Thus, a long history of cooperative networking and interlibrary lending has...

Reviews

I actually started off reading this article ebook. It is writter in simple phrases instead of hard to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
