

Proceedings of the Annual Convention of the American Bankers Association Volume 1887

Filesize: 6 MB

Reviews

This publication is definitely not simple to begin on studying but quite fun to see. It really is full of knowledge and wisdom I am just effortlessly can get a satisfaction of studying a created pdf.

(Alfreda Bradtke)

PROCEEDINGS OF THE ANNUAL CONVENTION OF THE AMERICAN BANKERS ASSOCIATION VOLUME 1887

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 86 pages. LC Number: KF27 . I519 2008b OCLC Number: (OCoLC)317891942 Subject: Enhanced oil recovery -- Technological innovations -- United States. Excerpt: . . . 11 through terrestrial sequestration using soils and trees, or by injection into geologic formations. Geological storage of carbon dioxide in porous and permeable rocks involves injection of carbon dioxide into a subsurface rock unit and displacement of the fluid or formation water that initially occupied the pore space. This principle operates in all types of potential geological storage formations such as oil and gas fields, deep saline water-bearing formations, or coal beds. Most of the potential carbon dioxide storage capacity in the U. S. is in deep saline formations. The BLM anticipates taking a leadership role, in collaboration with other agencies, in evaluating and developing, where appropriate, long-term carbon sequestration efforts. The BLMs existing administrative and regulatory framework will help facilitate future carbon sequestration demonstration projects and potentially, leasing, and ultimately inform a robust, coordinated regulatory regime. In addition to experience in administering a large-scale mineral leasing program, we have the relevant expertise and an existing framework for issuing rights-of-way on public land that could serve future needs for carbon dioxide pipelines across public lands. Other programmatic and land management expertise, such as the BLMs experience in evaluation of potential environmental impacts of projects, will facilitate this effort. Other agencies, such as USGS, DOE, and EPA will also play an important role in recommending geologic criteria that could be incorporated into a set of best practices for geologic site selection. The BLM looks forward to working closely with the USGS, DOE, EPA, the National laboratories, other Federal agencies, academia, industry and the public to develop geologic and technical criteria that could be used...
